**glibt historical society neighborhood: Queer Public History** Marc Stein, 2022-03-29 Over the course of the last half century, queer history has developed as a collaborative project involving academic researchers, community scholars, and the public. Initially rejected by most colleges and universities, queer history was sustained for many years by community-based contributors and audiences. Academic activism eventually made a place for queer history within higher education, which in turn helped queer historians become more influential in politics, law, and society. Through a collection of essays written over three decades by award-winning historian Marc Stein, *Queer Public History* charts the evolution of queer historical interventions in the academic sphere and explores the development of publicly oriented queer historical scholarship. From the AIDS crisis of the 1980s and the rise of queer activism in the 1990s to debates about queer immigration, same-sex marriage, and the politics of gay pride in the early twenty-first century, Stein introduces readers to key themes in queer public history. A manifesto for renewed partnerships between academic and community-based historians, strengthened linkages between queer public history and LGBT scholarly activism, and increased public support for historical research on gender and sexuality, this anthology reconsiders and reimagines the past, present, and future of queer public history.

**glibt historical society neighborhood: The Advocate** , 2005-11-22 *The Advocate* is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Established in 1967, it is the oldest continuing LGBT publication in the United States.

**glibt historical society neighborhood: The Closet and the Cul-de-Sac** Clayton Howard, 2019-04-12 The right to privacy is a pivotal concept in the culture wars that have galvanized American politics for the past several decades. It has become a rallying point for political issues ranging from abortion to gay liberation to sex education. Yet this notion of privacy originated not only from legal arguments, nor solely from political movements on the left or the right, but instead from ambivalent moderates who valued both personal freedom and the preservation of social norms.

In *The Closet and the Cul-de-Sac*, Clayton Howard chronicles the rise of sexual privacy as a fulcrum of American cultural politics. Beginning in the 1940s, public officials pursued an agenda that both promoted heterosexuality and made sexual privacy one of the state's key promises to its citizens. The 1944 G.I. Bill, for example, excluded gay veterans and enfranchised married ones in its dispersal of housing benefits. At the same time, officials required secluded bedrooms in new suburban homes and created educational campaigns designed to teach children respect for parents' privacy. In the following decades, measures such as these helped to concentrate middle-class families in the suburbs and gay men and lesbians in cities. In the 1960s and 1970s, the gay rights movement invoked privacy to attack repressive antigay laws, while social conservatives criticized tolerance for LGBTQ+ people as an assault on their own privacy. Many self-identified moderates, however, used identical rhetoric to distance themselves from both the discriminatory language of the religious right and the perceived excesses of the gay freedom struggle. Using the Bay Area as a case study, Howard places these moderates at the center of postwar American politics and shows how the region's burgeoning suburbs reacted to increasing gay activism in San Francisco. *The Closet and the Cul-de-Sac* offers specific examples of the ways in which government policies shaped many Americans' attitudes about sexuality and privacy and the ways in which citizens mobilized to reshape them.

**glbt historical society neighborhood: Matchmaking in the Archive** E.G. Crichton, 2023-02-10 Though today's LGBTQ people owe a lot to the generations who came before them, their historical inheritances are not always obvious. Working with the archives of the Gay Lesbian Bisexual Transgender Historical Society, artist E.G. Crichton decided to do something to bridge this generation gap. She selected 19 innovative LGBTQ artists, writers, and musicians, then paired each of them with a deceased person whose personal artifacts are part of the archive. Including 25 pages of vivid images, *Matchmaking in the Archive* documents this monumental creative project and adds essays by Jonathan D. Katz, Michelle Tea, and Chris Vargas, who describe their own unique encounters with the ghosts of LGBTQ history. Together, they make the archive come alive in remarkably intimate ways.

**glbt historical society neighborhood: Sex Museums** Jennifer Tyburczy, 2016-01-11 Museums have lengthy history, going back to the Renaissance Cabinets of Curiosity, and they are indices of changing fashions of perception insofar as the categories museum curators use to classify objects change over time. The major focus of Tyburczy's study is sexuality on display, which sets up, in turn, her investigation of the effects of museum display on the history of sexuality. Historical context for the museum is one of her themes (and how categories of normativity and perversity change over time), with another theme being the work of sex museums in redefining what sex means in the modern public sphere; she also folds in consideration of the pleasures and dangers of exhibiting marginalized sexual subjects (women, nonwhite races, LGBT individuals, and the like); last, she explores the paradox of asserting (as she does) that all museums are sex museums. Bodies move around and toward objects on display, they reshape the typical dances of museum-goers along with their preconscious motivations in visiting a museum. She proposes that explicit display or restagings of sexual artifacts provides new ways for approaching and understanding issues of desire, sexual identity, and sexual practices as they intersect with the history of the modern museum and with sexual history during the past two centuries. Her fieldwork sites are: the Leather Archives & Museum in Chicago, the Museum of Sex in New York, the World Erotic Art Museum in Miami Beach, and El Museo del Sexo in Mexico City. Such institutions allow Tyburczy to show how alternative sexuality (inclusive of kink, fetish, and sadomasochistic cultures) and slavery dangerously crisscross on the surface of objects. There are plenty of cases here, in short, to keep the casual reader titillated and the erudite reader surprised.

**glbt historical society neighborhood: Planning and LGBTQ Communities** Petra L. Doan, 2015-03-24 Although the last decade has seen steady progress towards wider acceptance of lesbian, gay, bisexual, transgendered, and queer (LGBTQ) individuals, LGBTQ residential and commercial areas have come under increasing pressure from gentrification and redevelopment initiatives. As a

result many of these neighborhoods are losing their special character as safe havens for sexual and gender minorities. Urban planners and municipal officials have sometimes ignored the transformation of these neighborhoods and at other times been complicit in these changes. *Planning and LGBTQ Communities* brings together experienced planners, administrators, and researchers in the fields of planning and geography to reflect on the evolution of urban neighborhoods in which LGBTQ populations live, work, and play. The authors examine a variety of LGBTQ residential and commercial areas to highlight policy and planning links to the development of these neighborhoods. Each chapter explores a particular urban context and asks how the field of planning has enabled, facilitated, and/or neglected the specialized and diverse needs of the LGBTQ population. A central theme of this book is that urban planners need to think beyond queer space because LGBTQ populations are more diverse and dispersed than the white gay male populations that created many of the most visible gayborhoods. The authors provide practical guidance for cities and citizens seeking to strengthen neighborhoods that have an explicit LGBTQ focus as well as other areas that are LGBTQ-friendly. They also encourage broader awareness of the needs of this marginalized population and the need to establish more formal linkages between municipal government and a range of LGBTQ groups. *Planning and LGBTQ Communities* also adds useful material for graduate level courses in planning theory, urban and regional theory, planning for multicultural cities, urban geography, and geographies of gender and sexuality.

**gibt historical society neighborhood: Preservation and Place** Katherine Crawford-Lackey, Megan E. Springate, 2019-09-04 Significant historic and archaeological sites affiliated with two-spirit, lesbian, gay, bisexual, transgender, and queer history in the United States are examined in this unique volume. The importance of the preservation process in documenting and interpreting the lives and experiences of queer Americans is emphasized. The book features chapters on archaeology and interpretation, as well as several case studies focusing on queer preservation projects. The accessible text and associated activities create an interactive and collaborative process that encourages readers to apply the material in a hands-on setting.

**glbt historical society neighborhood: *Historical Geography, GIScience and Textual Analysis*** Charles Travis, Francis Ludlow, Ferenc Gyuris, 2020-02-29 This book illustrates how literature, history and geographical analysis complement and enrich each other's disciplinary endeavors. The Hun-Lenox Globe, constructed in 1510, contains the Latin phrase 'Hic sunt dracones' ('Here be dragons'), warning sailors of the dangers of drifting into uncharted waters. Nearly half a millennium earlier, the practice of 'earth-writing' (geographia) emerged from the cloisters of the great library of Alexandria, as a discipline blending the twin pursuits of Strabo's poetic impression of places, and Herodotus' chronicles of events and cultures. Eratosthenes, a librarian at Alexandria, and the mathematician Ptolemy employed geometry as another language with which to pursue 'earth-writing'. From this ancient, East Mediterranean fount, the streams of literary perception, historical record and geographical analysis (phenomenological and Euclidean) found confluence. The aim of this collection is to recover such means and seek the fount of such rich waters, by exploring relations between historical geography, geographic information science (GIS) / geoscience, and textual analysis. The book discusses and illustrates current case studies, trends and discourses in European, American and Asian spheres, where historical geography is practiced in concert with human and physical applications of GIS (and the broader geosciences) and the analysis of text - broadly conceived as archival, literary, historical, cultural, climatic, scientific, digital, cinematic and media. Time as a multi-scaled concept (again, broadly conceived) is the pivot around which the interdisciplinary contributions to this volume revolve. In *The Landscape of Time* (2002) the historian John Lewis Gaddis posits: "What if we were to think of history as a kind of mapping?" He links the

ancient practice of mapmaking with the three-part conception of time (past, present, and future). Gaddis presents the practices of cartography and historical narrative as attempts to manage infinitely complex subjects by imposing abstract grids to frame the phenomena being examined—longitude and latitude to frame landscapes and, occidental and oriental temporal scales to frame timescapes. Gaddis contends that if the past is a landscape and history is the way we represent it, then it follows that pattern recognition constitutes a primary form of human perception, one that can be parsed empirically, statistically and phenomenologically. In turn, this volume reasons that literary, historical, cartographical, scientific, mathematical, and counterfactual narratives create their own spatio-temporal frames of reference. Confluences between the poetic and the positivistic; the empirical and the impressionistic; the epic and the episodic; and the chronologic and the chorologic, can be identified and studied by integrating practices in historical geography, GIScience / geoscience and textual analysis. As a result, new perceptions and insights, facilitating further avenues of scholarship into uncharted waters emerge. The various ways in which geographical, historical and textual perspectives are hermeneutically woven together in this volume illuminates the different methods with which to explore terrae incognitae of knowledge beyond the shores of their own separate disciplinary islands.

**glbt historical society neighborhood:** Identities and Place Katherine Crawford-Lackey, Megan E. Springate, 2019-11-01 With a focus on historic sites, this volume explores the recent history of non- heteronormative Americans from the early twentieth century onward and the places associated with these communities. Authors explore how queer identities are connected with specific places: places where people gather, socialize, protest, mourn, and celebrate. The focus is deeper look at how sexually variant and gender non-conforming Americans constructed identity, created communities, and fought to have rights recognized by the government. Each chapter is accompanied by prompts and activities that invite readers to think critically and immerse themselves in the subject matter while working collaboratively with others.

**glbt historical society neighborhood:** **Breaking the Gender Code** Georgina Hickey, 2023-12-12 A history of the activism that made public spaces in American cities more accessible to women. From the closing years of the nineteenth century, women received subtle—and not so subtle—messages that they shouldn't be in public. Or, if they were, that they were not safe. *Breaking the Gender Code* tells the story of both this danger narrative and the resistance to it. Historian Georgina Hickey investigates challenges to the code of urban gender segregation in the twentieth century, focusing on organized advocacy to make the public spaces of American cities accessible to women. She traces waves of activism from the Progressive Era, with its calls for public restrooms, safe and accessible transportation, and public accommodations, through and beyond second-wave feminism, and its focus on the creation of alternative, women-only spaces and extensive anti-violence efforts. In doing so, Hickey explores how gender segregation intertwined with other systems of social control, as well as how class, race, and sexuality shaped activists' agendas and women's experiences of urban space. Drawing connections between the vulnerability of women in public spaces, real and presumed, and contemporary debates surrounding rape culture, bathroom bills, and domestic violence, Hickey unveils both the strikingly successful and the incomplete initiatives of activists who worked to open up public space to women.
