barclays financial services conference 2022: Royal Histories Joel Z. Garrod, 2025-02-28 The aftermath of the 2008 financial crisis produced diverse solutions, from nationalizing banks to increasing government spending and taxing capital. However, these proposals all faced significant obstacles in being realized. Industry lobbying has since weakened reforms, leading to ineffective policies, raising the larger question of how to understand our current period of globalization where older strategies are ineffective but new solutions seem unattainable. In *Royal Histories*, Joel Z. Garrod presents a historical analysis of the Royal Bank of Canada, illustrating how Canadian capitalism and the Canadian banking industry have transformed as they have consolidated nationally and expanded abroad. Emphasizing how national institutions and rules are increasingly becoming capabilities for transnational forms of capital accumulation, the book draws on extensive primary and secondary sources to document the transformation of the assemblage of territory, authority, and rights that have supported the bank's activities over time. Linking the bank's history to the policy regimes of the welfare state and neoliberalism, Garrod contends that our present period of globalization is constituted by a novel organizing dynamic that severely limits the extent to which nation-states can absorb capitalist crises or be a site of successful social reform. Connecting the Canadian experience to the wider transformation of global capitalism, *Royal Histories* illuminates the effects of globalization and the changing landscape of banking and finance.

barclays financial services conference 2022: Bank Insolvency Law in Developing Economies Kayode Akintola, Folashade Adeyemo, 2022-12-30 The subject of bank stability has been under a great amount of political and legislative scrutiny since the mid-2007 to late-2009 global financial crisis. However, these efforts have centred on developed economies. Little coverage is given to strategies adopted by many developing economies. While there is a global discourse on the subject of insolvency generally, there is ample scope to contribute to the growing body of work on the narrow subject of bank insolvencies. This book provides a unique perspective on an emerging theme in at least two respects. First is the focus on selected developing economies and selected developed economies in the EMEA region alongside cross-border developments, with the objective of deciphering the regulatory approach to bank insolvencies. The second is the analytical consideration of methods that may be implemented to preclude or resolve bank insolvencies in developing economies. This book explores the nexus between developing economies and their banking institutions. Developing economies are acutely dependent on their banks for the functioning of their cash-based economies. Recent events, however, suggest a weakness in the long-term viability of some of their banks and a mixed-bag regulatory approach to redress this weakness. This book evaluates the effectiveness of regulatory frameworks in selected developing economies that are designed to prevent or resolve the insolvency of banks. At a time of global economic uncertainty, this book will prove to be a valuable resource to the discourse on the viability of banks, businesses, and economies in developing States.

barclays financial services conference 2022: The Digital Revolution in Banking, Insurance and Capital Markets Lech Gąsioriewicz, Jan Monkiewicz, 2023-02-22 The digital transformation of finance and banking enables traditional services to be delivered in a more effective and efficient way but, at the same time, presents crucial issues such as fast-growing new asset classes, new currencies, datafication and data privacy, algorithmization of law and regulation and, last but not least, new models of financial crime. This book approaches the evolution of digital finance from a business perspective and in a holistic way, providing cutting-edge knowledge of how the digital financial system works in its three main domains: banking, insurance and capital markets. It offers a

bird's-eye view of the major issues and developments in these individual sectors. The book begins by examining the wider framework of the subsequent analysis and over the next three parts, discusses the opportunities, risks and challenges facing the digitalization of these individual financial subsectors, highlighting the similarities and differences in their digitalization agenda, as well as the existing linkages and dependencies among them. The book clarifies the strategic issues facing the development of digital finance in these major subsectors over the coming years. The book has three key messages: that digital transformation changes fundamentally the way financial businesses operate; that individual trades have their own digitalization agenda; and that the state with its regulatory power and central banking and money has a particularly important role to play. It will be of interest to scholars, students and researchers of finance and banking, as well as policymakers wishing to understand the values and limitations of new forms of digital money.

barclays financial services conference 2022: Trade and Development Report 2023 United Nations Conference on Trade and Development (UNCTAD), 2023-10-04 The Trade and Development Report 2023 analyses current economic trends and major policy issues of international concern and makes suggestions for addressing these issues at various levels. The report warns that the global economy is stalling, with growth slowing in most regions compared with last year and only a few countries bucking the trend. The global economy is at a crossroads, where divergent growth paths, widening inequalities, growing market concentration and mounting debt burdens cast shadows on the future. The prospect of meeting the Sustainable Development Goals (SDGs) by 2030 is fading as a combination of rising interest rates, weakening currencies and slowing export growth squeezes the fiscal space needed for governments to fight climate change and provide for their people. The report calls for a change in policy direction – including by leading central banks – and accompanying institutional reforms promised during the COVID-19 crisis to avert a lost decade. It urges global financial reforms, more pragmatic policies to tackle inflation, inequality and sovereign debt distress, and stronger oversight of key markets. The report proposes actions to get the global economy moving in the right direction by using a balanced policy mix of fiscal, monetary and supply-side measures to achieve financial stability, boost productive investment and create better jobs. Part I of the report launches on 4 October 2023 with part II expected in November.

barclays financial services conference 2022: Corporate Governance, Organizational Ethics, and Prevention Strategies Against Financial Crime Hyacinthe Yirlier Somé, Narjess Boubakri, Omrane Guedhami, 2025-03-14 This book examines how corporate ethics, social responsibility, and prevention strategies against financial crime may remedy shortcomings of corporate governance. Corporate governance structures and mechanisms may contribute to enhancing the value of integrity in organizational life. The book describes how corporate governance and social responsibility reports and programs may allow executives and directors to deepen the meaning of corporate governance, as it is related to organizational culture. Furthermore, the volume discusses how corporate governance structures and mechanisms (including the board of directors and shareholder activism) might have a significant impact on the way integrity is safeguarded in an organization. The contributions shed light on methods to clarify and extend the implications of corporate governance while taking risk management strategies into account.

barclays financial services conference 2022: Banking Institutions and Natural Disasters Andi Duqi, 2023-07-21 This book looks more closely at how natural disasters impact bank activity and how banks can support economic recovery after a natural disaster. The importance of banks in this context is underscored by increasing regulatory attention on their role in fostering a sustainable future, but also on the risks that climate change poses to bank stability. Humanity has tried to cope with the short- and long-term economic consequences of natural disasters for centuries. However, the severity of these events is constantly increasing in magnitude, due to the alteration of the earth's climate and the environment. They pose a serious threat to the lives of millions of people especially in less developed countries. At the same time, the international community has acknowledged that weather hazards' impact and countries' resilience to them are affected by various socio-economic factors, such as the well-functioning of financial institutions, especially commercial banks. Banks will inevitably adapt their strategies to address concerns arising from climate change. In doing this, the book discusses partnerships with international cooperation institutions, other financial intermediaries, and local governments, so that the green transition ensures an inclusive growth for all, especially the most vulnerable parts of our societies. This book is of interest to researchers, academics, and students of sustainable finance and climate finance.

barclays financial services conference 2022: A New Global Geometry? Greg Albo, 2024-06-18 Scrutinizes possibilities for an equalised global order, in light of recent conflicts between the world's major powers The "post-Cold War era is definitively over," asserted US President Joe Biden as he launched the new National Security Strategy, warning in late 2022 that "a competition is underway between the major powers to shape what comes next." American leadership, the document declared, would be more necessary than ever to define the future of the international order," insisting that the US must marshal its unparalleled economic, military, and diplomatic resources to confront its geopolitical rivals. Socialist Register 2024: A New Global Geometry? takes stock of momentous changes on the horizon: Even if these geopolitical shifts do not spell the end of globalization, how might they alter its historical trajectory? While it is premature to speak of the end of the liberal economic order, let alone the development of a multipolar international system, can we begin to assess the dimensions of a new global geometry? And, how might we assess the potential vulnerabilities of socialist movements worldwide, alongside the potential resistance our movements might manage to present, grounded in our historical demands for a democratic and equalizing world order?

barclays financial services conference 2022: You May Never See Us Again Jane Martinson, 2023-10-19 'Part Ozymandias, part Succession' - Financial Times 'A tour de force' - Guardian A Financial Times Book of the Year 2023 The inside story of the rise and fall of the Barclay brothers, secretive business titans and one-time owners of the Ritz and the Daily Telegraph Born poor, the Barclay brothers were enigmatic twins who built one of the biggest fortunes in Britain together from scratch and spent six decades at the epicentre of business, media and politics. Their empire, said to be worth £7bn at its height, included Littlewoods, the Ritz Hotel, the Daily Telegraph and the channel island of Brecqhou. They were major advocates for Brexit and well-connected with influential politicians including Margaret Thatcher, Boris Johnson and Nigel Farage. And yet despite their fortune and influence, their fiercely guarded desire for privacy has meant that their story has remained largely unknown - until a very public family dispute pitched Barclay against Barclay in the High Court. In You May Never See Us Again, journalist Jane Martinson unravels the fascinating story of these once inseparable billionaire brothers. Through their lives she offers compelling insights into post-war Britain, from the conditions that enabled their way of doing business to thrive, through to the tightly enmeshed webs of influence between capitalism, politics and the media that shape Britain today.
