soc 100 purdue exam 1: *Limiting Privilege* Agata Zysiak, 2023-12-15 State socialism tried to industrialize, urbanize, encourage the more frequent washing of hands, urge people to leave the church, emancipate women, and electrify cities—all within a single lifetime. Central to these initiatives was extending educational opportunities to the working class and creating a vision of an egalitarian socialist university that offered advancement for all. *Limiting Privilege: Upward Mobility Within Higher Education in Socialist Poland* traces the possibilities and limits of this goal by looking at a model socialist university established in 1945 in the working-class city of Łódź, Poland. Initially a flagship project of socialist modernization, the university tried to offer social advancement by privileging admission for peasant and working-class children, but these efforts were often fought by the elite who sought to preserve their privilege. By looking at first-generation students, intelligentsia

faculty, and an industrial city, *Limiting Privilege* explores a complex story about utopian visions, failed aspirations, and reluctant academia.
