Given the multiple versions of A Star Is Born available on DVD, consumers often face the question of which edition to choose. Differences in video quality, special features, and packaging all influence

the decision.

The 1954 Musical Classic

Often hailed as the definitive version, the 1954 film is frequently recommended for its compelling narrative and Garland's legendary performance. Its DVD release commonly features restored Technicolor sequences and improved soundtracks, making it a must-have for classic film enthusiasts. However, some versions may lack extensive bonus material, so buyers should check the specific release details.

The 1976 Rock Adaptation

This iteration offers a more contemporary approach for its time, highlighted by Streisand's vocal prowess and a soundtrack that blends rock and pop. DVD editions tend to include interviews and commentary, appealing to fans of '70s cinema and music. While not as critically acclaimed as the 1954 version, it remains an important cultural artifact.

a star is born dvd: *Hollywood by Hollywood* Steven Cohan, 2019 The backstudio picture, or the movie about movie-making, is a staple of Hollywood film production harking back to the silent era and extending to the present day. What gives backstudios their coherence as a distinctive genre, Steven Cohan argues in *Hollywood by Hollywood*, is their fascination with the mystique of Hollywood as a geographic place, a self-contained industry, and a fantasy of fame, leisure, sexual freedom, and modernity. Yet by the same token, if backstudio pictures have rarely achieved blockbuster box-office success, what accounts for the film industry's interest in continuing to produce them? The backstudio picture has been an enduring genre because, aside from offering a director or writer a chance to settle old scores, in branding filmmaking with the Hollywood mystique, the genre solicits consumers' strong investment in the movies. Whether inspiring the movie crazy fan girls of the early teens and twenties or the wannabe filmmakers of this century heading to the West Coast after their college graduations, backstudios have given emotional weight and cultural heft to filmmaking as the quintessential American success story. But more than that, a backstudio picture is concerned with shaping perceptions of how the film industry works, with masking how its product depends upon an industrial labor force, including stardom, and with determining how that work's value accrues from the Hollywood brand stamped onto the product. Cohan supports his well theorized and well researched claims with nuanced discussions of over fifty backstudios, some canonical and well-known, and others obscure and rarely seen. Covering the hundred-year timespan of feature length film production, *Hollywood by Hollywood* offers an illuminating perspective for considering anew the history of American movies.

Diehl, 2020-12-15 Since the nineteenth century, the Western realistic novel has persistently represented the addict as a morally toxic force bent on destroying the institutions, practices, and ideologies that historically have connoted reason, order, civilization. Addiction, Representation undertakes an investigation into an alternative literary tradition that unsettles this limited portrayal of the addict. The book analyzes the practices and politics of reading the experimental addiction novel, and outlines both a practice and an ethics of reading that advocates for a more compassionate response to both diegetic and extra-diegetic addicts—an approach that, at its core, is focused on understanding.

a star is born dvd: Feeling Colour Bregt Lameris, 2025-03-06 The shift back from quasi monochrome to coloured motion picture during the 1950s and 1960s famously provided moviegoers the dazzling opportunity to more fully engage their senses, all the while opening new modes of affective possibilities for filmmakers. Set against the intersection of media studies, emotion theory, biology, and digital humanities, Feeling Colour: Chromatic Embodiment in Film Culture (1950s-1960s) delves into the role colour played in the oft-fraught relationship between cinema and its audiences. This transnational analysis of an extensive range of midcentury cinematography examines the multilayered effects which extend beyond the silver screen, offering a high-level theoretical elaboration and in-depth historical exploration of both experimental and mainstream movies. Lameris takes an interdisciplinary perspective, examining the different ways colour creates—or was believed to create—embodied reactions. From perception theory and 'putting the nerves in motion', to colour psychology and how to 'steer' the spectator, to cross-modal perception (or 'synaesthesia'), Lameris asks how colours and feelings in film are entangled in the colour cultures, discourses and beliefs of a particular historical context. With its influential cultural scholarly contribution and accessible writing style, this book will delight both students and specialists in film and media studies. In addition, those interested in the history and use of color in advertising, neuroscience, gender studies, and emotion will find the book engaging and useful.

a star is born dvd: Alcohol in the Movies, 1898-1962 Judy Cornes, 2015-03-12 A 1906 film called The Dream of a Rarebit Fiend shows a man drinking and eating voraciously at a restaurant, then going home to bed. In the surreal scenes that follow, furniture disappears, tiny devils poke the man's head with pitchforks, and his bed hurls itself out the window and across the city. But it wasn't commentary on drinking; rather, it was a showcase of early special effects--double exposure photography, panning shots, and montage. Turn-of-the-century films typically treated drinking as a

subject for comedy and ridicule, and the comic possibilities translated well into silent movies. As talkies developed and the film industry matured, alcohol's portrayal was reflected in the times: prohibition, the Great Depression, the war years, and as social commentary. Here is a study of 64 years of alcohol as portrayed in film. The author begins with the appearance in 1898 of what is probably the first commercial: a 30-second film of men in kilts dancing and the words Scotch Whiskey appearing in the background. The final film is 1962's *Days of Wine and Roses*, which addresses alcoholism. The author includes a film from each decade, those with artistic or historical value, those that represent the comedy, drama and musical genres, and well-known pictures such as *The Lost Weekend* and *A Star Is Born*. The first three chapters cover 1903 to 1939. The remaining chapters follow not a timeline but the growing complexity of the movies. A recurring motif is the use of the term white logic, a phrase used by writer Jack London in his 1913 memoir *John Barleycorn*. It refers to disillusionment with everyday life brought on by and exacerbated by alcohol. An annotated filmography lists the date, source and other relevant information about movies in this study.

The range of stars includes popular stars who are approached from fresh angles (Brando, Loren), less popular stars whose lower-profiles than their peers may be surprising (Taylor, Shearer) and stars whose national identity is integral to their perception as they age (Riva, Bachchan, Pavor). There are stars from the beginning of Hollywood (Valentino, Reid) to the present day (Jolie), and those who made uneasy transitions between countries (Mason), ages (Ringwald) and industrial eras (Keaton). The book examines the range of factors that affect how star images endure, including appropriate and inappropriate ageing (Griffith), race (Ice Cube) and digital technologies (Lee).

a star is born dvd: The Christmas Roses Must Not Die Richard Shields, 2014-11-12 ...life is mocked by death, and we are the fools. --Justin Chance. Is this the despairing conviction of an eighteen-year-old boy haunted by personal demons pursuing him as he runs from a tragic past? Or were these words uttered in ignorance of the real demons seen by supersleuth Benjamin Wade as the Baby-Boomer parents of Michael Weston and Michael's betrothed Erin Jennings. When the friendship of Michael and Justin metamorphoses into romantic love before the fireplace on a snowy Christmas Eve, their lives suddenly change forever. Michael, a successful software entrepreneur at the young age of twenty, must now choose between Love and Love and can only watch helplessly as his world begins to collapse around him. A story of two boys who are coming of age in a Baby Boomer-dominated society and who find themselves suddenly faced with all the great questions humanity has perpended for millennia--questions about love and life and fate and who we are as participants in the social order, indeed as members of the human species--it is an indictment of the Boomer generation and the world that generation has created. As Michael and Justin struggle to understand the great personal and societal forces bearing down heavily upon them and to do what they each believe in their young minds is the right thing under impossible circumstances, their superior intelligence can find little guidance in the accepted wisdom of their country. A cast of colorful characters animates a story of deep emotion engaging the reader, a story whose suspense rivets as it builds toward the dramatic climax.

a star is born dvd: The Stardom Film Karen McNally, 2020-12-08 Since the earliest days of the movie industry, Hollywood has mythologized itself through stories of stardom. A female protagonist escapes the confines of rural America in search of freedom in a western dream factory; an ambitious, conceited movie idol falls from grace and discovers what it means to embody true stardom; or a fading star confronts Hollywood's obsession with youth by embarking on a determined mission to reclaim her lost fame. In its various forms, the stardom film is crucial to understanding how Hollywood has shaped its own identity, as well as its claim on America's collective imagination.

In the first book to focus exclusively on these modern fairy tales, Karen McNally traces the history of this genre from silent cinema to contemporary film and television to show its significance to both Hollywood and broader American culture. Drawing on extensive archival research, she provides close readings of a wide range of films, from *Souls for Sale* (1923) to *A Star is Born* (1937 and 1954) and *Judy* (2019), moving between fictional narratives, biopics, and those that occupy a space in between. McNally considers the genre's core set of tropes, its construction of stardom around idealized white femininity, and its reflections on the blurred boundaries between myth, image, and reality. *The Stardom Film* offers an original understanding of one of Hollywood's most enduring genres and why the allure of fame continues to fascinate us.

a star is born dvd: *Deanna Durbin in Hollywood* Barry Lowe, 2024-02-23 Known as the first film teenager, Deanna Durbin was one of the most popular actresses of the 1930s and 1940s. From starring alongside legends like Judy Garland to playing the lead role in classic film musicals, her rise to fame seemed almost like fantasy. But her life behind the scenes was anything but glamorous. Though Durbin was a princess to the public, she was a puppet to film studios and producers and a punching bag for critics and gossip columnists. At the end of her twelve-year career, her only wish was to be forgotten. Impossible. This book pays tribute to Deanna Durbin by detailing her life and career in the context of her time and appraises her film work from both a contemporaneous and a modern view. It includes a short biography, an in-depth discussion of her films, and an extensive filmography and bibliography of her work. Readers will discover the true identity behind the people's Cinderella and how Durbin's career opened Hollywood's studio gates to a generation of adolescent performers.

a star is born dvd: *Music/Video* Gina Arnold, Daniel Cookney, Kirsty Fairclough, Michael Goddard, 2017-08-30 This book is a lively, comprehensive and timely reader on the music video, capitalising on cross-disciplinary research expertise, which represents a substantial academic engagement with the music video, a mediated form and practice that still remains relatively under-explored in a 21st century context. The music video has remained suspended between two distinct poles. On the one hand, the music video as the visual sheen of late capitalism, at the intersection of celebrity studies and postmodernism. On the other hand, the music video as art, looking to a prehistory of avant-garde film-making while perpetually pushing forward the digital frontier with a taste for anarchy, controversy, and the integration of special effects into a form designed to be disseminated across digital platforms. In this way, the music video virally re-engenders debates about high art and low culture. This collection presents a comprehensive account of the music video from a contemporary 21st century perspective. This entails revisiting key moments in the canonical history of the music video, exploring its articulations of sexuality and gender, examining its functioning as a form of artistic expression between music, film and video art, and following the music video's dissemination into the digital domain, considering how digital media and social media have come to re-invent the forms and functions of the music video, well beyond the limits of "music television".
