political science major yale: *The Soul of Politics* Glenn Ellmers, 2023-10-17 WITH A NEW PREFACE BY THE AUTHOR Harry V. Jaffa (1918-2015), professor at Claremont McKenna College and distinguished fellow of the Claremont Institute, was one of the most influential thinkers of the twentieth century. His hundreds of students have reached positions of power and prestige throughout the intellectual and political world, including at the Supreme Court and the Trump White House. Jaffa authored Barry Goldwater's famous 1964 Republican Convention speech, which declared, "Extremism in the defense of liberty is no vice. And moderation in the pursuit of justice is no virtue." William F. Buckley, Jaffa's close friend and a key figure in shaping the modern conservative movement, wrote, "If you think it is hard arguing with Harry Jaffa, try agreeing with him." His widely acclaimed book *Crisis of the House Divided: An Interpretation of the Issues in the Lincoln-Douglas Debates* (1959) was the first scholarly work to treat Abraham Lincoln as a serious philosophical thinker. As the earliest protégé of the controversial scholar Leo Strauss, Jaffa used his theoretical insights to argue that the United States is the "best regime" in principle. He saw the American Revolution and the Civil War as world-historical events that revealed the true nature of politics. Statesmanship, constitutional government, and the virtues of republican citizenship are keys to unlocking the most important truths of political philosophy. Jaffa's student, Glenn Ellmers, was given complete access to Jaffa's private papers at Hillsdale College to produce the first comprehensive examination of his teacher's vast body of work. In addition to Lincoln and the founding fathers, the book shares Jaffa's profound insights into Aristotle, William Shakespeare, Winston Churchill, and more.

political science major yale: The Game of Life James L. Shulman, William G. Bowen, 2011-08-15 The President of Williams College faces a firestorm for not allowing the women's lacrosse team to postpone exams to attend the playoffs. The University of Michigan loses \$2.8 million on athletics despite averaging 110,000 fans at each home football game. Schools across the country struggle with the tradeoffs involved with recruiting athletes and updating facilities for dozens of varsity sports. Does increasing intensification of college sports support or detract from higher education's core mission? James Shulman and William Bowen introduce facts into a terrain overrun by emotions and enduring myths. Using the same database that informed *The Shape of the River*, the authors analyze data on 90,000 students who attended thirty selective colleges and universities in the 1950s, 1970s, and 1990s. Drawing also on historical research and new information on giving and spending, the authors demonstrate how athletics influence the class composition and campus ethos of selective schools, as well as the messages that these institutions send to prospective students, their parents, and society at large. Shulman and Bowen show that athletic programs raise even more difficult questions of educational policy for small private colleges and highly selective universities than they do for big-time scholarship-granting schools. They discover that today's athletes, more so than their predecessors, enter college less academically well-prepared and with different goals and values than their classmates--differences that lead to different lives. They reveal that gender equity efforts have wrought large, sometimes unanticipated changes. And they show that the alumni appetite for winning teams is not--as schools often assume--insatiable. If a culprit emerges, it is the unquestioned spread of a changed athletic culture

through the emulation of highly publicized teams by low-profile sports, of men's programs by women's, and of athletic powerhouses by small colleges. Shulman and Bowen celebrate the benefits of collegiate sports, while identifying the subtle ways in which athletic intensification can pull even prestigious institutions from their missions. By examining how athletes and other graduates view The Game of Life--and how colleges shape society's view of what its rules should be--Bowen and Shulman go far beyond sports. They tell us about higher education today: the ways in which colleges set policies, reinforce or neglect their core mission, and send signals about what matters.

political science major yale: African American Perspectives on Political Science Wilbur Rich, 2007-01-15 Race matters in both national and international politics. Starting from this perspective, African American Perspectives on Political Science presents original essays from leading African American political scientists. Collectively, they evaluate the discipline, its subfields, the quality of race-related research, and omissions in the literature. They argue that because Americans do not fully understand the many-faceted issues of race in politics in their own country, they find it difficult to comprehend ethnic and racial disputes in other countries as well. In addition, partly because there are so few African Americans in the field, political science faces a danger of unconscious insularity in methodology and outlook. Contributors argue that the discipline needs multiple perspectives to prevent it from developing blind spots. Taken as a whole, these essays argue with great urgency that African American political scientists have a unique opportunity and a special responsibility to rethink the canon, the norms, and the directions of the discipline.

political science major yale: The Encyclopedia of Public Choice Charles Rowley, Friedrich Schneider, 2008-01-25 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice. However, the title would not convey sufficiently the breadth of the Encyclopedia's contents which can be summarized better as the fruitful interchange of economics, political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible. This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume, Adam Ferguson and Adam Smith contributed to all these fields, and more. However, as intellectual specialization gradually replaced broad-based scholarship from the mid-nineteenth century onwards, it became increasingly rare to find a scholar making major contributions to more than one. Once Alfred Marshall defined economics in neoclassical terms, as a narrow positive discipline, the link between economics, political science and moral philosophy was all but severed and economists redefined their role into that of 'the humble dentist' providing technical economic information as inputs to improve the performance of impartial, benevolent and omniscient governments in their attempts to promote the public interest. This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War.
