The play's title, taken from the opening line of Virgil's Aeneid ("Arma virumque cano" – "I sing of arms and the man"), is deliberately ironic. Indem die Gottesbilder des William Blake nach kunsthistorischen Methoden untersucht werden, eröffnet sich ein ungewohnter Zugang zu der Gedankenwelt des Künstlers. Detaillierte Analysen der einzelnen Bilder und die Thematisierung ihrer bisher kaum berücksichtigten Vielfalt und Heterogenität führen zu der These, dass Blake Diversität und Inkongruenz als bewusstes Stilmittel einsetzt. Bei jedem der unterschiedlichen Bilder relativiert sich die Bildaussage durch die anderen Bilder mit ihrer anderen Aussage. Auch enthält jedes Einzelbild merkwürdige Details und Unstimmigkeiten, die zum Denken anregen. Blakes Bilder sollen vom sinnlich Wahrnehmbaren zum Denken führen. Entsprechend dem Motto All Religions are One behauptet Blake, dass es in der sichtbaren Vielfalt eine Einheit gibt, die nur dem Denken zugänglich ist. Durch die Wahrnehmung der spezifischen Gestaltung seiner Bilder erschließt sich diese Philosophie.

arms and the man text: Practicing Intertextuality Max J. Lee, B. J. Oropeza, 2021-10-29

Practicing Intertextuality attempts something bold and ambitious: to map both the interactions and intertextual techniques used by New Testament authors as they engaged the Old Testament and the discourses of their fellow Jewish and Greco-Roman contemporaries. This collection of essays functions collectively as a handbook describing the relationship between ancient authors, their texts, and audience capacity to detect allusions and echoes. Aimed for biblical studies majors, graduate and seminary students, and academics, the book catalogues how New Testament authors used the very process of interacting with their Scriptures (that is, the Masoretic Text, the Septuagint, and their variants) and the texts of their immediate environment (including popular literary works, treatises, rhetorical handbooks, papyri, inscriptions, artifacts, and graffiti) for the very production of their message. Each chapter demonstrates a type of interaction (that is, doctrinal reformulations, common ancient ethical and religious usage, refutation, irenic appropriation, and competitive appropriation), describes the intertextual technique(s) employed by the ancient author, and explains how these were practiced in Jewish, Greco-Roman, or early Christian circles. Seventeen scholars, each an expert in their respective fields, have contributed studies which illuminate the biblical interpretation of the Gospels, the Pauline letters, and General Epistles through the process of intertextuality.

arms and the man text: Language, Cohesion and Form Margaret Masterman, 2005-01-16

Margaret Masterman was a pioneer in the field of computational linguistics. Working in the earliest days of language processing by computer, she believed that meaning, not grammar, was the key to understanding languages, and that machines could determine the meaning of sentences. She was able, even on simple machines, to undertake sophisticated experiments in machine translation, and carried out important work on the use of semantic codings and thesauri to determine the meaning structure of texts. This volume brings together Masterman's groundbreaking papers for the first time. Through his insightful commentaries, Yorick Wilks argues that Masterman came close to developing a computational theory of language meaning based on the ideas of Wittgenstein, and shows the importance of her work in the philosophy of science and the nature of iconic languages. Of key interest in computational linguistics and artificial intelligence, it will remind scholars of Masterman's significant contribution to the field.
