ancient rome for kids worksheets: A Theory of Great Men Daniel Greenstone, 2011-05-28 A Theory of Great Men is the humorous, fast-paced story of an irreverent, flawed man who has a talent for accumulating both proteges and enemies. George Cavaliere, a veteran high school history teacher, has many attributes of a brilliant educator. He's a vibrant classroom performance artist, his colleagues respect his knowledge of history, and he's popular with many students. Cavaliere is at his best when he's debunking the so-called Great Man theory of history, which maintains that the actions of major historical figures dominate the course of human events. Not so, Cavaliere insists. People's lives are shaped by sweeping forces beyond their control, and often their understanding. And yet his own life seems to show the opposite. Cavaliere's impatience with political correctness and his restless philandering lead to the unraveling of his career and his marriage. A part-time job coaching an underdog basketball team helps Cavaliere confront his own shortcomings and begin to see that, although he is anything but a great man, he is, nevertheless, the master of his own fate.

ancient rome for kids worksheets: *The World Is Our Classroom* Jennie Germann Molz, 2021-02-23 How travelling the world allows new ways to educate children and perform family life on the move A growing number of families are selling their houses, quitting their jobs, and taking their children out of traditional school settings to educate them while traveling the globe. In *The World Is Our Classroom*, Jennie Germann Molz explores the hopes and anxieties that drive these parents and children to leave their comfortable lives behind out of a desire to live the “good life” on the move. Drawing on interviews with parents and stories from the blogs they publish during their journeys, as well as her own experience traveling the world with her ten-year-old son, Germann Molz takes us inside a fascinating life spent on trains, boats, and planes. She shows why many parents—disillusioned with standard public schooling—believe the world is a child’s best classroom. Rebelling against convention, these parents combine technology and travel to pursue a different version of the good life, one in which parents can work remotely as “digital nomads,” participate in like-minded communities online, and expose their children to the risks, opportunities, and life lessons that the world has to offer. Ultimately, Germann Molz sheds light on the emerging phenomenon of “worldschooling,” showing that it is not just an alternative way to educate children, but an altogether new kind of mobile lifestyle. *The World is Our Classroom* paints an extreme portrait of twenty-first century parenting and some families’ attempts to raise global citizens prepared to thrive in the uncertain world of tomorrow.

ancient rome for kids worksheets: *Families, COVID, and Unequal Schooling in the US* Shelley Goldman, Brigid Barron, Elizabeth B. Kozleski, Antero Garcia, 2025-07-18 This book explores how parents became education partners in new and unexpected ways during the COVID pandemic. Emerging from a range of research studies, it reframes how researchers, educators, school leaders, and policymakers can establish and foster more equitable partnerships with families. The authors ultimately argue that COVID schooling erased boundaries between schools and families as families translated, decoded, and reshaped learning in their living rooms alongside their children. Chapters use firsthand accounts by parents and caretakers to contextualize and report on how families

managed their lives and the education of their children during the pandemic, before exploring the tensions and issues that arose for families which were pandemic caused or the results of educational disparities and inequalities being intensified by the COVID crisis. It thus reveals how caregivers struggled with employment and food insecurities as well as issues such as technology access and their children's learning needs. Building connections between research and practice, it re-imagines how families can be education partners, discussing how schools can carry families' assets into their work on improving schools during the pandemic, times of crisis, and into the post-pandemic future. It will appeal to researchers and graduates with interests in educational leadership, teacher education, sociology of education, and the sociology of family and parenting, with additional relevance for teachers and school administrators with interests in education in crises, school reform, and educational leadership.

By examining effective educational initiatives and analyzing how they work, educators, policymakers, and government officials can create a catalyst for positive educational reform and transformation. Adopting strength-based educational discourse, contributors to Education Transformation in Muslim Societies reveal how critical the whole-person approach is for enriching the brain and the spirit and instilling hope back into the teaching and learning spaces

of many Muslim societies and communities. Education Transformation in Muslim Societies is a copub with the International Institute of Islamic Thought.
